

Derek Marler

UI/UX ENGINEER

EXPERIENCE

Interface Engineer

eBay (Mar 2016 - Current)

Taking (and even helping with) the work from design team to then craft the mocks into high fidelity HTML, CSS, and JavaScript that I implement directly into the codebase. Experienced with Angular 2 and Github workflows.

Designer

Guidebook (Aug 2013 - Jul 2015)

Helped build out the web version of the app. Provided design and code for multiple promotional pages. Lead the highly successful redesign of the guide management/creation tool (Gears). Created mocks for new mobile features, such as chat.

Product Designer

WePay (Oct 2011 - Jul 2013)

Took ownership and lead over several projects. Aided the engineering team in troubleshooting CSS problems during implementation reviews. Committed code to our code base for weekly releases via SVN.

REFERENCES

Derek was a pleasure to work with. During his time at Somo Enterprises (aka Friend.ly), he was passionate, detail-oriented, and got along great with everyone else on our team.

Ed Baker
Head of Growth @ Uber

Derek is a terrific designer who can design great looking websites, along with having amazing CSS/HTML [...] I enjoyed working with Derek and would recommend him as a top UI/visual designer.

Akash Garg
Dir. of Engineering, Mobile @ Uber

A hard worker and excellent illustrator. He made great strides as a designer since joining WePay. It was a pleasure collaborating with Derek on the projects our team was tasked with.

Dylan Wreggelsworth
Designer Coworker @ WePay
